

Online Gaming Website - Assets Document

Game name: Moonpack Relay

1. Project Asset Summary

This document provides the visual and content assets for the online gaming website task. The freelancer may use these notes to build a front-end website and playable browser demo.

- Game title: Moonpack Relay
- Game type: browser-based tile-routing puzzle
- Visual theme: moonlit forest, glowing route tiles, silver-blue night palette, warm gold token highlights
- Core player goal: guide the courier from start tile to den tile while collecting moon tokens and avoiding shadow tiles

2. Suggested Website Copy

- Tagline: Build the path before the moon fades.
- Short description: Rotate glowing forest tiles, collect moon tokens, and lead the courier safely to the den.
- Button labels: Play Demo, Restart Level, Next Level, View Rules
- Leaderboard label: Sample Trail Scores

3. Visual Style Notes

- Background: deep navy or midnight blue
- Accent colors: moon silver, soft cyan glow, violet shadow, warm gold token color
- UI style: rounded cards, glowing borders, readable buttons, clear icons
- Tone: cozy fantasy puzzle, friendly, non-scary, no combat focus

4. Game Object Reference

Object	Description	Suggested visual
Start tile	Player begins here	Green-blue tile with S label
Den goal tile	Route destination	Gold tile with D label
Route tile	Walkable path	Blue tile with line or curve
Moon token	Bonus collectible	Small gold circle or star
Shadow tile	Blocked or penalty tile	Dark violet tile with slash
Move counter	Limits each level	Numeric counter near score

5. Sample Level Rules

- Include at least five levels.
- Level 1 should teach the route mechanic.
- Level 2 should add a moon token.
- Level 3 should add shadow tiles.
- Level 4 should require route planning under a move limit.
- Level 5 should combine tokens, hazards, and a harder route.

6. Required Source Notes

- List all fonts, icons, images, libraries, code snippets, AI tools, and external resources used.
- If all code and visuals are created for this project, state that clearly.
- Do not use paid assets unless source and license are disclosed.

7. Reference Layout Guidance

Use the provided `reference_image.png` as a layout guide. It is a simple visual reference showing a landing area, play area, instructions area, score cards, and a game board. The final website may improve the layout but should keep these core sections.

8. Scope Boundaries

- No login or account system.
- No payment, betting, real-money reward, crypto, NFT, loot-box purchase, or gambling feature.
- No external leaderboard database.
- No chat, private messaging, or user profile storage.
- No backend server required for the core demo.
- No upload of user data to external services.
